- **Systems Procurement Plans**

AFMSS Products

- **Current**

- **Mission Planning System (MPS)**

- **UNIX Based: Sanders**

- **Portable Flight Planning Software (PFPS)**

- **Windows 95/NT: Tybrin**

MPS II

MPS III

PFPS

MPS IV

- **Future**

- **Joint Mission Planning System (JMPS)**

- **PC-laptop, scaleable, DII-COE compliant: Logicon**

AFMSS = MPS + PFPS + JMI

JMPS ROADMAP

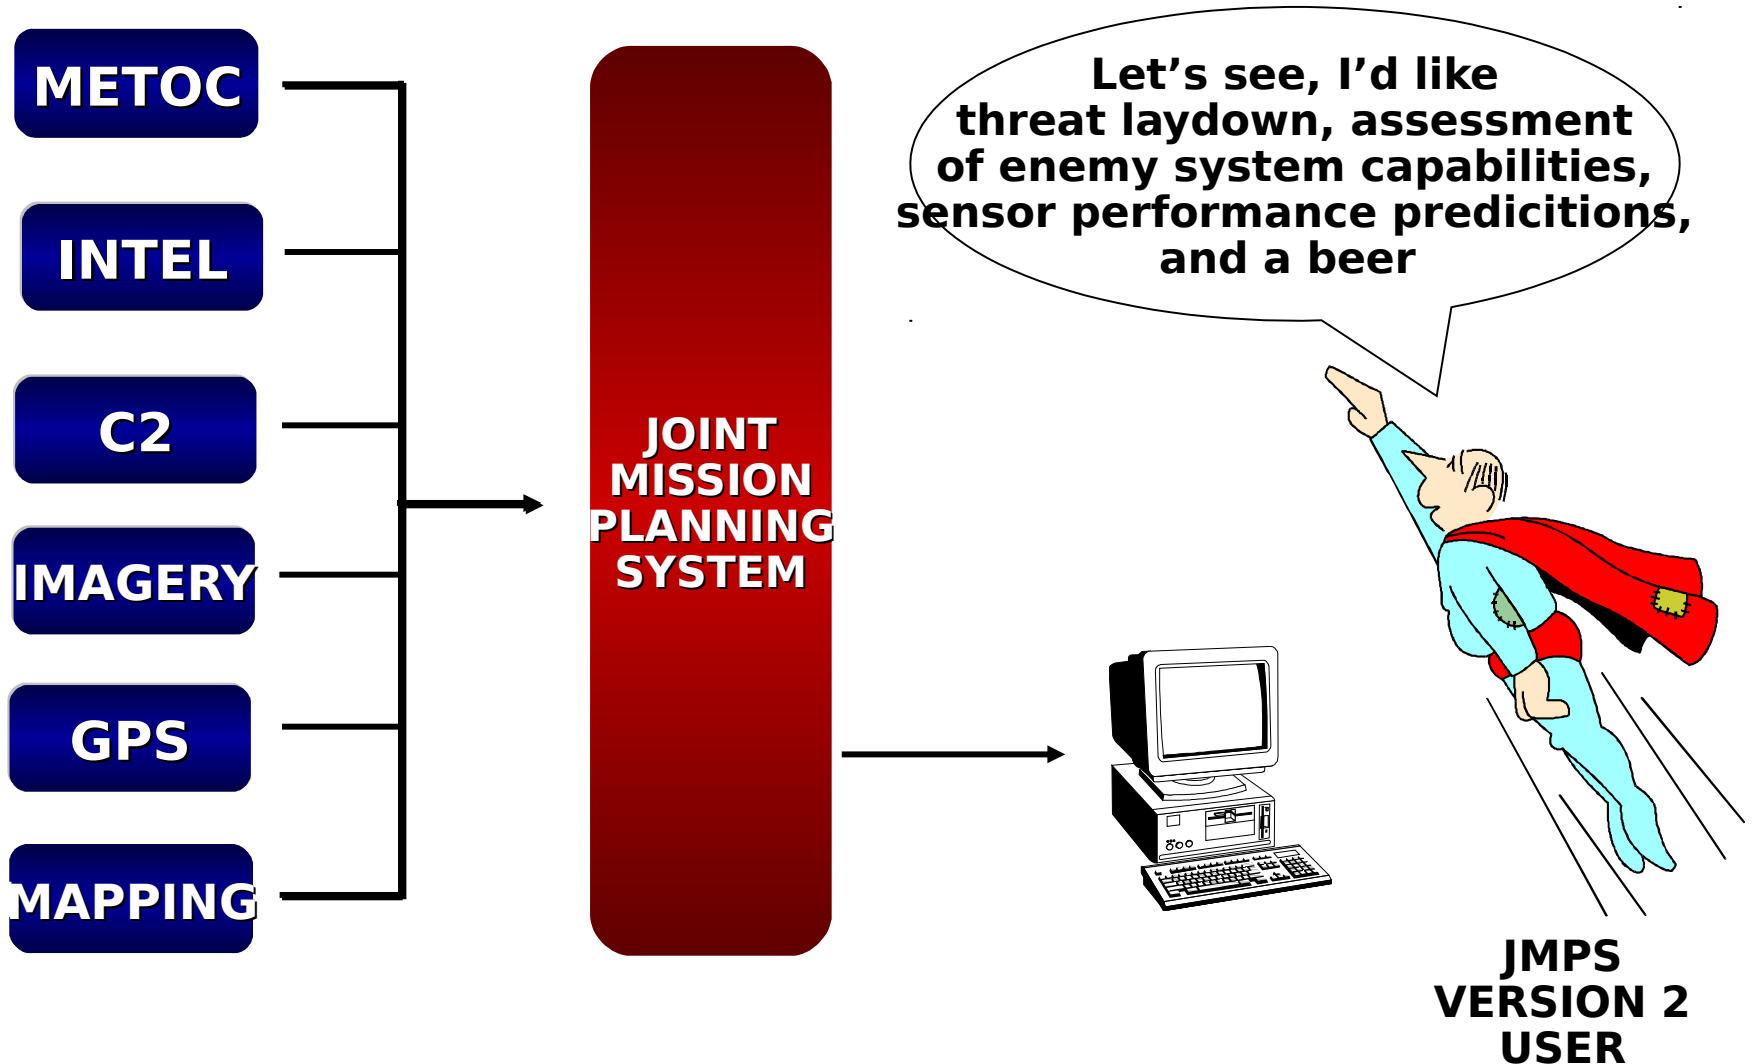

What's The Problem

JMPS Basic Mission Planning

What's The Problem

JMPS Combat Mission Planning

How To Build a JMPS...

that is the question

$$\text{PFPS} + \text{MPS} = \text{JMPS} (?)$$

New MP Capability Ideas

A Better Idea

JMPS Common Component (CC) Advocacy

- **Lobbying MAJCOMs for CC Advocacy**
 - **Impact**
 - Window “closed” WRT influencing JMPS architecture
 - **Multi-Level Security (MLS)**
 - JSF funded Phase I study re: architectural issues
 - **MLS not in JMPS V1.0: Remains unfunded req’t**
 - Supported by ORD; No ACC \$
 - Supported by JSF and F-22; No \$ committed
 - **Other AF-USN common components:**
 - GATM, PGMs, and CLOAR
 - Require champions to define requirement and identify funding

ESC Initiatives Based on Lesson Learned

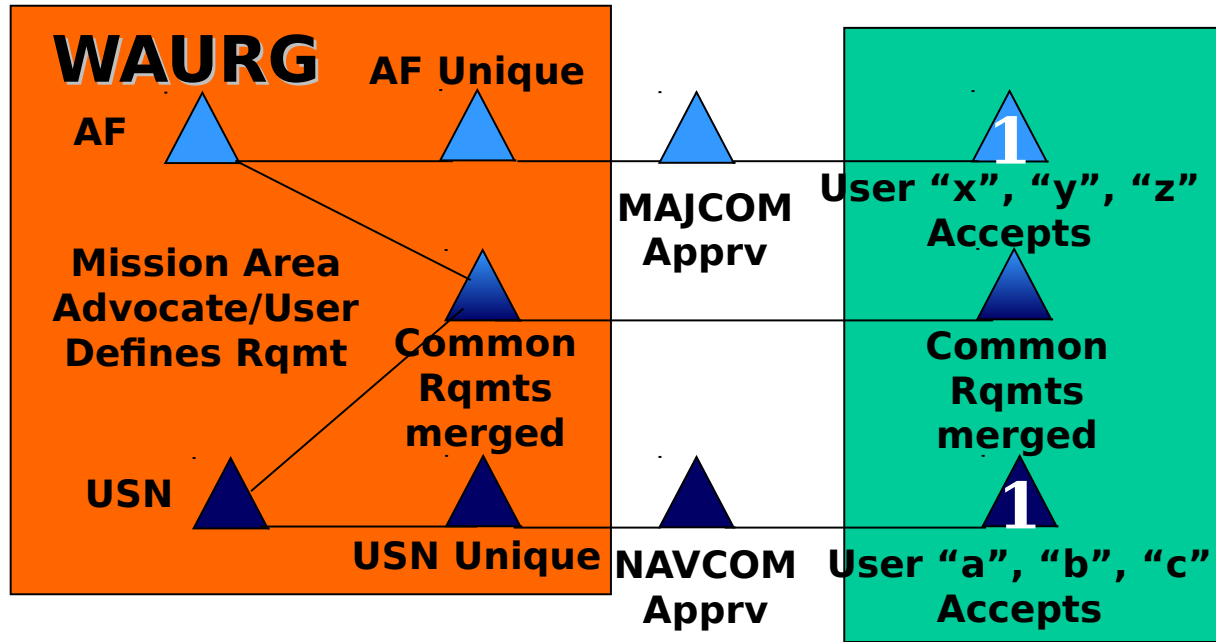

- Requirements viability

- AFMSS

- Rebaselining impacts Cost, Schedule, and Performance

-- JMPS WAURG Process

Reducing Requirements Cycle Time

- **FR = Fix Rqmt**
- **DC = Devel Capability**
- **FC = Field Capability**
- **RA = Rqmt Analysis**

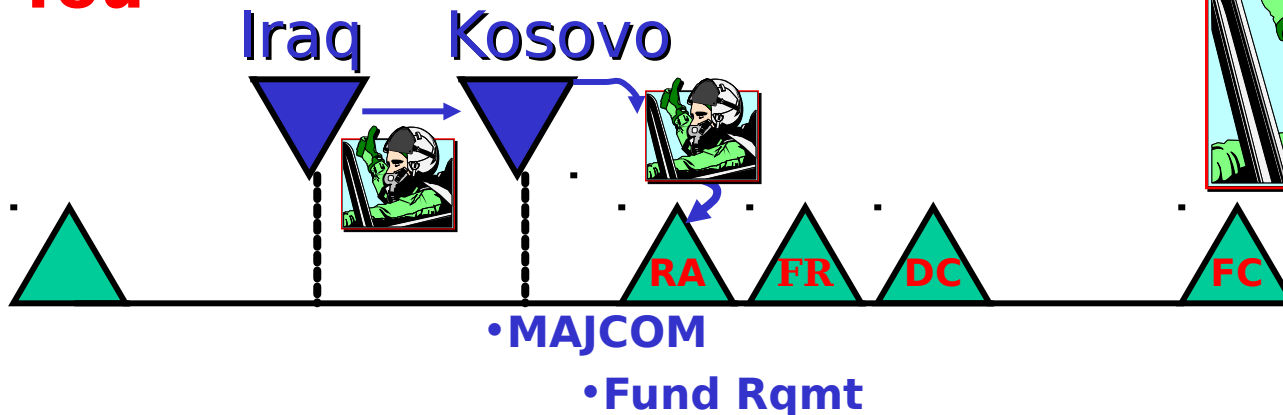

Desert Storm

Requirements Currency and Response Time

= You

**The WAURG needs
You!**

MPS III and MPS V Comparison

MPS III

Motherboard: Sun SPARC20

Processor: Dual 150MHz HyperSPARC

RAM: 128MB

Graphics Card: None

Bus: SCSI Wide

CD-ROM: 12X Drive

Tape Drive: 4mm

MPS V

Motherboard: Sun Ultra Axi

Processor: One 440MHz

RAM: 512MB

Graphics Card: 3D graphics card w/ 15MB RAM

Bus: Integr 16 bit SCSI Ultrawide PCI card for HD

CD-ROM: 40X Drive

Tape Drive: 4mm DDS-3 DAT Tape Drive

Basic MPS-III and MPS-V chassis are the same

PC Investment Plan (Cumulative)

MAJCOM Objectives:

ACC: 1 pc/PAA

AMC: 1 pc/aircrew

Note: These #s include technology refreshment

Migrating from MPS/PFPS to JMPS

Integrated C2 Wing/Unit Systems

- **CAF C2 SPO expands ESC/ACU role (a/o 1 Jan)**
- **Increase focus on Integrated C2 & Wing Ops**
 - **Encompasses products in and destined for WOC/SOC**
 - **ESC/ACU Develops: AFMSS/JMPS**
 - **ESC/ACU Integrates: Intell Syst, Planning Cell, Sched, Command Post, Plans**
 - **Forcing Function for unit-level systems**
 - **Service Wing/Unit needs of all customers**

ESC/AC One-Stop Shopping for WOC/SOC Capability

Aircrew Input Gets It Done

- **Aircrew comments carry weight (pro & con)**
 - You all have the 1999 systems
 - Hopefully better
 - MP (PFPS and MPS) need aircrew advocacy
- **MAJCOM/XOs influence allocation of \$\$\$**
 - Influence XOs when say “We can’t do mission x”
- **We rely on you to:**
 - Push the current tools envelope
 - Continue to describe needed fixes via MAJCOMs, SSRs, etc.
 - Pass on ideas for new MP potential

MPS Configuration - Improvements
